*Extending The Capabilities
Of Supply Chain Applications
TO THE POINT OF WORK ACTIVITY*

Quest Collect Lite is a data collection system providing accurate, timely inventory information for better business decisions. Quest Collect Lite runs exclusively on a Unitech PT630 or HT630. Data is uploaded to your PC and reported via an Excel spreadsheet.

Modules include Receiving, Item Transfer, Shipping, Inventory, and Asset Audit. The software can be configured to activate all the applications or just certain components to fit individual requirements.

Quest Collect Lite .Net is a version of Quest Collect Lite that runs on a Unitech 960 Series or any Windows Mobile device.

Quest Collect Inventory provides accurate and timely information for inventory reporting and inquiries. The Quest Collect Inventory software is configured with integrated modules that run on a PC and use an SQL data base for storing the inventory information.

Modules include Receiving, Put-Away, Material Move, Shipping, Inventory, and Cycle Count.

Optional features include RF real time mode, custom reports, bar code label printing, and serial/lot number tracking and more. Software customization is available to fit individual requirements.

Quest Collect Tool Crib is an easy to use, cost effective data collection system for checking tools or product inventory in and out of storage locations.

Quest Collect Shop Floor is a data collection system for tracking direct labor, indirect labor, and shop floor production results. Quest Collect Shop Floor is a complimentary companion to Quest Collect Inventory.

Quest Collect Mobile is a data collection system for mobile workers. Quest Collect Mobile is custom software developed specifically for you. The software is configured to individual requirements including barcode scanning, signature capture, drawing and camera capabilities, and more.

Quest Collect WAWF Lite is an easy to use and cost effective data collection system developed for DoD suppliers to meet the DoD WAWF mandate. Quest Collect WAWF Lite will read RFID encoded barcode tags, merging case and pallet shipping information for packet later processing. A bar code scanner is included with this software.

Quest Collect RFID a data collection system developed for DoD suppliers to meet the DoD WAWF mandate. Quest Collect RFID will read RFID encoded barcode tags, merging case and pallet shipping information for WAWF reporting.
