## Quest Collect Lite

Quest Collect Lite is an easy-to-use, cost-effective data collection system providing accurate, timely information for better business decisions. Quest Collect Lite runs exclusively on a Unitech PT630 or HT630.

Modules include **Receiving**, **Item Transfer**, **Shipping**, **Inventory**, and **Asset Audit**. The software can be configured to activate all the applications or just certain components to fit individual requirements.

The Unitech PT630 and HT630 hand held terminals are rugged mobile devices designed to meet the demands of the various applications. The ruggedness of these units boosts productivity and protects your purchase investment. Weighing less than 250 grams, they are easy to handle and the robust housing enables them to survive multiple 5-foot (1.5 meter) drops to a concrete floor.

The flexible modular design, including bar code reading and keypad input, make the units perfect multi-functional terminals for data collection applications.

## Receiving

Receiving module collects information on in-coming vendor purchase orders.

Data collected:

- ✓ Purchase Order Number
- ✓ Item Number
- ✓ Quantity Received

Report provides information on orders received. All transactions are stamped with the Date and Time.

Manufacturing can now be alerted quickly when critical components arrive.

## Item Transfer

Item Transfer module tracks warehouse items moving from one location to another.

Whether you transfer from your Receiving Dock to the warehouse, in-house transfers, or from your warehouse to the Shipping Dock, this transaction will keep your 'actual' Inventory up-to-date.

### Data collected:

- ✓ From (old) Location
- ✓ Item Number
- ✓ Quantity Transferred
- ✓ To (new) Location

Report identifies inventory locations and items. All transactions are stamped with the Date and Time.

Microsoft Excel - Report\_Transfer.xls

EMPLOYEE	FROM LOCATION	ITEM #	QUANTITY	TO LOCATION	DATETIME

## Shipping

Shipping module collects information on out-going orders.

Data collected:

- ✓ Order Number
- ✓ Picked From Location
- ✓ Item Number
- ✓ Quantity Shipped

Report provides up-to-date information on orders shipped. All transactions are stamped with the Date and Time.

Customers can be kept up-to-date with accurate shipping status information pertaining to their orders.

## Item Inventory

Inventory module collects information on current inventory status.

Data collected:

- ✓ Location
- ✓ Item Number
- ✓ Quantity

Report provides up-to-date information on inventory status. All transactions are stamped with the Date and Time.

This module helps eliminate the “I know it’s here but I can’t find it” situation.
